

#### Introduction -

The I-7012 is an Analog Input module that is designed for both voltage and current input types. In addition, the module provides 1 Digital Input channel as a 50 Hz event counter and 2 Digital Output channels that can be used as a high/low alarm. The I-7012 also features 3000 VDC intra-module isolation.

The I-7012F is an Analog Input module that is designed for both voltage  $\,$ and current input types. The sampling rate for the I-7012F is adjustable and can be switched between fast mode and normal mode depending on your requirements. In addition, the module provides 1 Digital Input channel as a 50 Hz event counter and 2 Digital Output channels that can be used as a high/low alarm. The I-7012F also features 3000 VDC intra-module isolation.

## System Specifications .

| Model                                     | I-7012   | I-7012D         | I-7012F       | I-7012FD |
|---|--|-----------------|---------------|----------|
| Communication                             |  |                 |               |          |
| Interface                                 | RS-485   |                 |               |          |
| Bias Resistor                             | No (Usually supplied by the RS-485 Master. Alternatively, add a tM-SG4 or SG-785.) |                 |               |          |
