Introduction

BRK Series is an Communication Server that specially provides Broker function of MQTT protocol for MQTT message distribution and concentrator in M2M and Industrial Internet of Things environments. The BRK Series is compatible with the MQTT version V.3.1, V.3.1.1 and V.5.0 protocol. It supports many functions such as QoS message quality mechanism, retains mechanism, identity authentication, communication encryption, last message (Last Will), and bridge. And support Web UI setting method to quickly set up BRK functions. It can reduce the burden of setting up the server by user oneself and reduce the maintenance cost. Besides, BRK Series provides Bridge, Cluster, Load Balancer, and High Availability functions. Composing multiple BRK Series to form a better Redundancy system can prevent field systems from stopping services due to hardware or network failures.
